PROFILE

Designer and technical fabricator specializing in computational modeling, digital workflows, and physical construction. Grounded in hands-on material fabrication—from fine joinery to structural welding—and technical spatial design, bridging complex digital systems with buildable, physical space.

EDUCATION

M.Arch, Southern California Institute of Architecture 2023–2026

B.A., Architectural Studies (Digital Humanities minor), University of California, Los Angeles 2018–2020

A.S., Liberal Arts, Santa Monica College 2015–2018

PROFESSIONAL EXPERIENCE

PJC Drafting | Lead Drafter, Residential Permitting 2025–Present

- Produce permit drawing sets (floor plans, elevations, sections, roof plans) for single-family and senior residential projects submitted for city and county approval.
- Carry drawings from existing conditions through design development and permit submittal, incorporating client revisions.

Exhibit A | Drafting Consultant 2025

- Drafted interior plans and elevations for residential kitchen and bath remodels through multiple client revisions.

SCI-Arc Resilient Futures Task Force | Drafter & Fabricator (Volunteer) 2025

- Helped design and build full-scale mockups of three wildfire-resilient timber assemblies (eaves, wall, deck), and drew them as annotated axonometrics for the SCI-Arc Demystifying Timber exhibition.

SCI-Arc | Graduate Teaching Assistant, Design Development 2024–2025

- Guided students on integrated building systems, structural logic, and assembly documentation.

SCI-Arc Wood & Metal Shop | Technical Fabrication Assistant 2023–2025

- Managed fabrication workflows and supervised safe use of table saws, band saws, and jointers.
- Advised on hardwood processing, joinery, and MIG welding for structural prototypes and large-scale models.

Monster City Studios | Technical Designer & Project Manager 2022–2023

- Took large-scale themed environments and interactive installations from concept design through fabrication and install.

cityLAB UCLA | Undergraduate Fellow 2019–2020

School Lands Housing Research | Directed Research with Dana Cuff Spring 2020

- Founding research team member: compiled precedents and land data for an interim report written with cityLAB, proposing a framework for evaluating where teacher housing on school-owned land succeeds.

Mercedes-Benz | Service Technician 2007–2015

HONORS

Dean's Honors List, University of California, Los Angeles Spring 2019, Winter 2020, Spring 2020

SKILLS

- **Drafting & Documentation:** AutoCAD, Revit, permit drawing sets, as-built documentation
- **Computational Design:** Rhino 8, Grasshopper, Python scripting, Blender
- **Mapping & Research:** ArcGIS, spatial analysis, precedent research
- **Generative AI:** ComfyUI, Flux, Stable Diffusion pipeline development
- **Digital Fabrication:** 3D printing, CNC milling, advanced woodworking, MIG welding
