PORTFOLIO · DRAWING & DOCUMENTATION

JOHN NORTHRUP

Designer & Digital Fabrication Specialist | Computational Workflows & Physical Systems

I am a designer and technical fabricator specializing in computational modeling, digital workflows, and physical construction. Grounded in hands-on material fabrication—from fine joinery to structural welding—and technical spatial design, my work bridges complex digital systems with buildable, physical space. I focus on technical design development, project management, and translating complex digital models into precise physical outcomes.

DESIGN DOCUMENTS

DESIGN DOCUMENTS
ADVISOR · HERWIG BAUMGARTNER

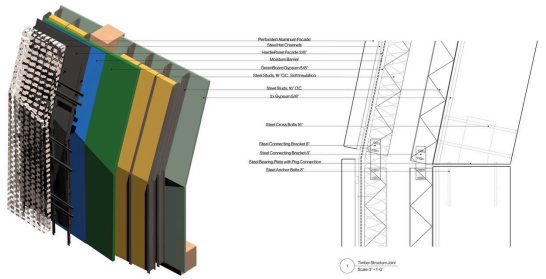

This course studies the implementation of design, technology, and an understanding of building systems. Students are tasked with preparing Design Document drawings from a previous year's studio project and are asked to bring it to life with real-world materials, budgets, and environmental factors.

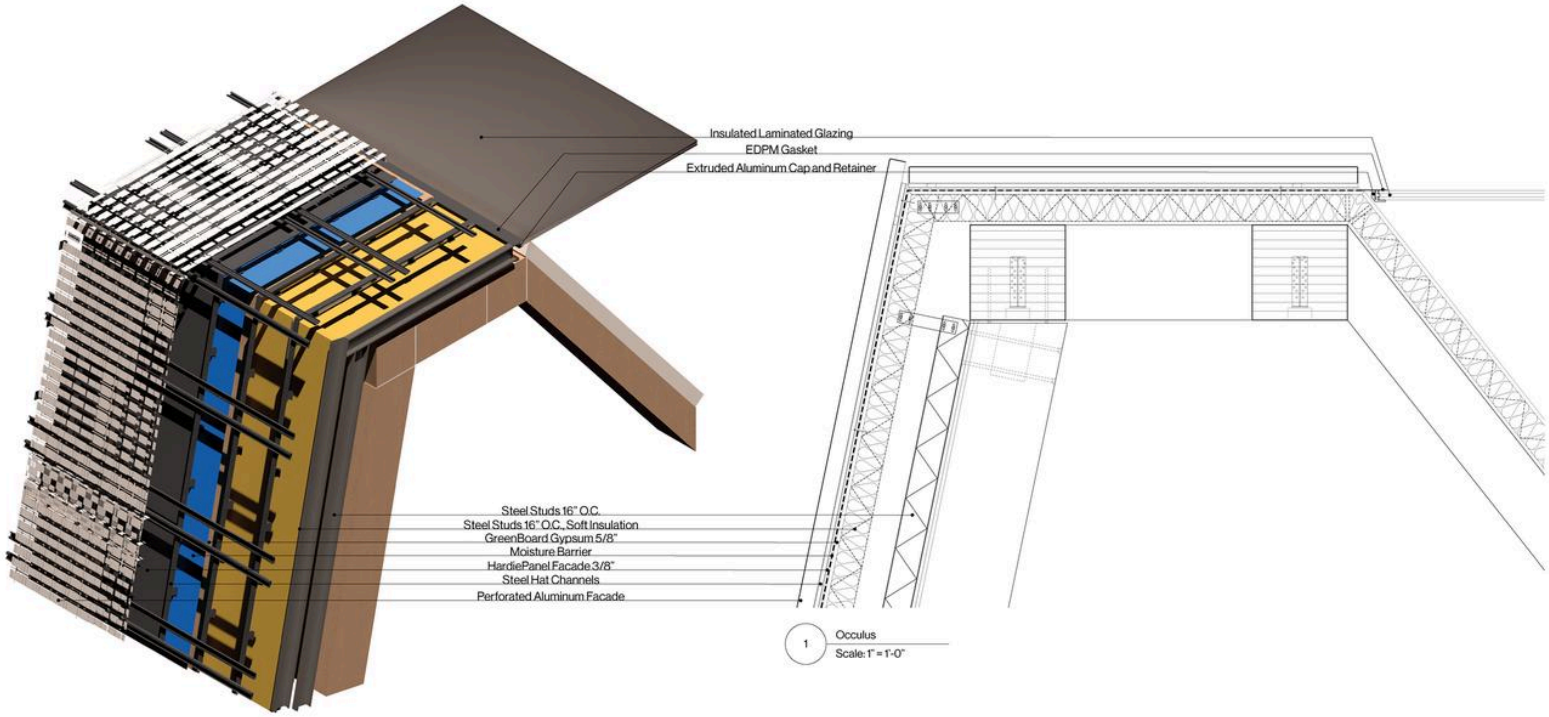

TYPICAL GROUND FLOOR WALL — PEEL-BACK RENDER AND DRAWING

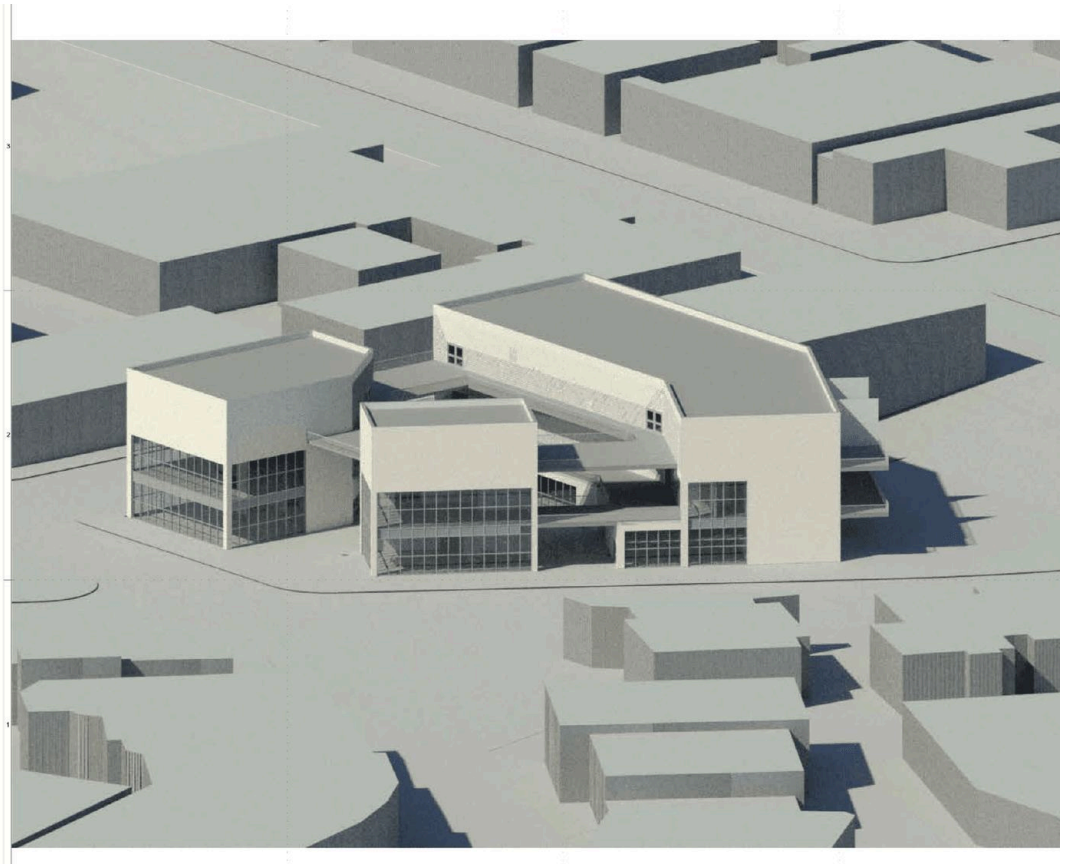

TYPICAL UPPER FLOOR WALL — PEEL-BACK RENDER AND DRAWING

TIMBER STRUCTURE JOINT — PEEL-BACK RENDER AND DRAWING

OCULUS SKYLIGHT — PEEL-BACK RENDER AND DRAWING

ADVANCED PROJECT DELIVERY

ADVANCED PROJECT DELIVERY
ADVISOR · PAVEL GETOV AND KARENZA HARRIS

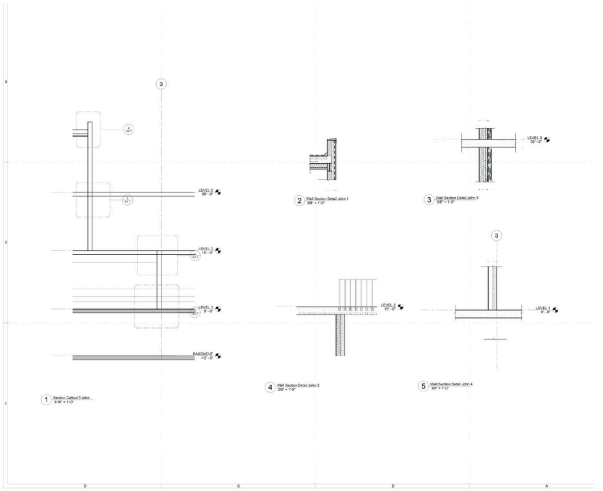

A Construction Documents course focused on taking a design through to buildable detail — resolving material assemblies, structural connections, and building systems into a coordinated drawing set. Site plans, reflected ceiling plans, and wall section sheets were developed to real-world standards of dimension, specification, and constructability.
